

# Specialized Administrative Services

**Digital Corporate Partners**

# About the Group

# Specialized Administrative Arm

Digital Corporate Partners arm (DCP) of Digital Partners Network advises both local and international companies in terms of structuring / restructuring to maximize operational and financial efficiency and at the same time minimize risks and expenses. DCP, currently made up of 4 companies, as per the below:

## Digital Fund Administrators (Africa) Limited

DFAAL, a company in the process of being licensed by the FSA of Seychelles, to provide Fund Administration services

## Digital Corporate Partners (Africa) Limited

DCPAAL, a company in the process of being licensed by the FSA of Seychelles, to provide cross-border corporate structuring advisory, set up and administration services

## Digital Corporate Partners Limited

DCPL is specialized in project management services to corporates in the following sectors:

- Large scale property and hotel development
- Entities undergoing automation / digitalization

## Associated Corporate Services Limited

ACSL, an established company secretarial business, headquartered in Mauritius, which provides, in partnership with other African companies, set up and ongoing company secretarial services in many African countries such as Mauritius, Seychelles, Kenya, South Africa, Tanzania, Botswana amongst others.

# Specialized Services

- E-estate planning solution
  - E-wallet solutions
  - Technical listing
  - Specific assistance with relocation to Mauritius, whether to:
    - Work. We offer assistance in applying for occupational permits,
    - Live. We offer administrative assistance to acquire a property in Mauritius, to apply for schools, to register with the public authorities, to open bank accounts
    - Play. We can assist for example with the registration of a yacht
- 

# E-estate Planning Solution

A good estate planning solution can involve various elements, such as an inter-vivos or testamentary trust, a Will and life or investment insurance plans.

We believe that one crucial issue with the easy execution of an estate plan relates to the access and storage of the relevant documentation.

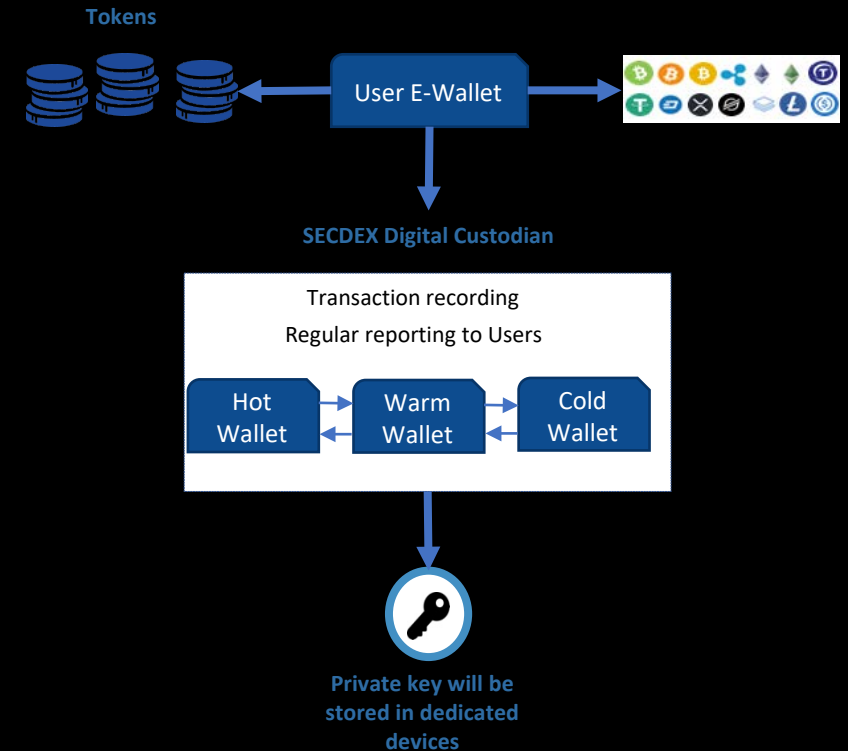

We at DPN seek to address this specific issue. We provide a practical and secure solution to our clients through our regulated digital custodian, SECDEX Digital Custodian Limited, namely:

- the creation and maintenance of a secure e-wallet, within which the client can safely keep and access varied documents and information
- digitalization of certified documents, such as trust deeds, wills, with encryption for added security, and stored on blockchain for immutability and easy access
- assistance with the creation of an inventory of assets list, which can be easily updated and accessed upon death
- assistance with the creation of a Letter of Wishes or safekeeping of a live video to be released as per the wish of the client, at his/her death
- automated execution of the documents such as the Will or testamentary trust, as a tailored service

# E-Wallet Solutions

E-Wallet Solutions are proposed in partnership with SECDEX Digital Custodian (SDC), for the below reasons:

- SDC adopts a multi-signature authorisation protocol to ensure that no single party is able to initiate and complete a transaction within its custody. Furthermore, under its technological platform operated by the venue, each key is held with segregated accounts.
- It is backed by a strong management team with a proven track record in the FinTech industry.
- SDC is part of a group which provides a full set of services to facilitate primary markets and secondary trading.
- SDC has a competitive transaction and custody fee structure. This is enabled by the fact it belongs to a full fledged market infrastructure group.
- The Seychelles government focuses on FinTech with National Fintech Strategy and its Regulatory Sandbox regime.
- Operates in a politically and economically stable environment.
- Seychelles has the 2nd Highest GDP per Capita in Africa.
- Seychelles is positioning itself as an international financial centre of repute and is a springboard into Africa.

# Technical Listing

- Allows visibility and transparency to chosen stakeholders
  - Offers an affordable listing option, compared to listing on major stock exchanges, without compromising on exposure to a strong regulatory stock exchange framework
  - Gets companies investor-ready and allows for progressive readiness for a full and tradeable listing, within the SECDEX ecosystem or another major stock exchange
  - Allows smaller companies and start-ups to experience a listing environment, because of reduced cost and the streamlined SECDEX listing process
  - No need to deposit physical shares to the exchange depository and settlement platform and therefore keeps costs low
  - No need to modify the shareholding structure in order to list
-
